

Regional Water Technician Meeting
September 28, 2006
Mid Sask CFDC/REDA Office
5:00 p.m.

Present: Russ McPherson, Denise Guillet, Harold Hurd, Donna Haug (via telephone), M.L. Whittles

Russ prepared a draft to be sent out to all of the urban municipalities within the Mid Sask REDA area. It outlined the parameters of the Regional Water Tech piece and highlighted a few scenarios for the urbans to consider when it comes to fee structure and how we would pay for this service within the region.

A few changes will be made to the plan before it is sent out. Because of municipal elections happening at the end of October, we will postpone the delivery of the plan until the new councils are in place. There are some areas of our region that will go under significant change regarding new councils and we want to ensure that this info gets to them, and not the outgoing councilors.

We need to stress in the cover letter that attendance at meetings does not mean commitment on the municipalities' part. Once all of the changes have been made, the document will be sent out November 1, 2006 and we will be asking the municipalities to reply to us no later than December 15, 2006.

Depending on the response we get, we will decide if we have enough interested players to make this project a go.
