

The WaterWolf Catch

WaterWolf Accomplishments Over the Past Year

- 3 BEM workshops
- Waterworks Assessment Bulk Buy
- Building Standards Workshop
- Formation of the WaterWolf Advisory Planning Commission

A Year of Cooperative Success

Well, it has already been a year gone by since the first issue of the WaterWolf Catch was published. During this time, WaterWolf has sponsored 3 Basic Emergency Management workshops, successfully brought 6 municipalities together for a group waterworks assessment, set up a building standards workshop scheduled for November 17th, explored efficient and more environmentally friendly waste water treatment options, created a formal advisory planning commission and are currently looking into bylaw enforcement options.

What has been accomplished so far is nothing less than amazing and this couldn't have been done without the progressive Rural and Urban Municipalities that make up the WaterWolf region. The partnerships that have been created make these services viable and give the region a stronger voice than ever before. We still have a long way to go, but from what has been delivered to date, our communities will only further themselves in years to come.

We look forward to seeing you at the next Planning Commission Meeting on November 23rd. For any questions relating to planning, please contact:

Update on The WaterWolf Growth Management Plan

Adam has been gathering Official Community Planning statements for the villages and towns to be included within the WaterWolf Growth Management Plan. The next step is to gather this information from the RM's. When this is finalized, Adam will send

you the finished copy for review. When the wording meets your needs, the plan should be complete. The next step is completing the zoning bylaws. After the zoning bylaws fit your needs, the WaterWolf Growth Management Plan can be adopted.
